

First of all, let me say well done for taking the time to log on and access this. Over the next number of months, I am going to try and teach you as best I can, I'll be honest this isn't going to be easy for any of us. None of us have ever had to do this before and none of us were prepared for this happening. With that said we can only try and when we get back together, I will try and cover it all again.

You can always get in touch with me using email ghill585@c2kni.net

All the work will be on the google drive account that you were emailed a link to, can I ask that you email when you first access google drive so that I know you can access it, or if you can't let me know and I'll sort it.

First things first I'm guessing lots of you have left your notes in my room. So, I've made up a set of notes that you can simply copy out on to paper.

Below is a guide. Each week I'll give you 2 lessons of work to complete, try and follow it as best you can. At the top of each slide, in blue, will be a note telling you what to do. We'll start from the beginning for those that missed it and encase we aren't allowed our notes back.

Week 1 Lesson 1	Open folder Mr Hill - Open the powerpoint starting at Week 1 Lesson 1, copy the notes and diagrams, up to slide 8.
Week 1 Lesson 2	Open folder Mr Hill - Open the powerpoint starting at Week 1 Lesson 2, copy the notes and diagrams up 2 slide 15. Try the online questions on slide 16
